Hello!

My name is Pedro Almeida, I'm a **full stack developer** from Portugal.

- 4 years of experience developing websites, on the front-end and backend with PHP/WordPress. Recently as a freelance.

Some of the projects I've worked in

Kendu

A Clothing tech/marketing startup from Spain

https://kendu.com

I was the lead **Web developer** behind the website working within a team of 2 other developers.

Kendu is an international clothing industry tech startup. They provide innovative and creative store promotional material for clothing shops.

This website uses **complex animations** developed using **JavaScript** and jQuery. It also uses Gutenberg, where almost all components inside each page is editable.

- Developed frontend using **Twig**, Sass, JavaScript ES6 and backend (WordPress, PHP)
- **Lead developer (in a team)**
- Responsible for helping junior developers into project
- Multi-language and multi-country

Zenmate

A VPN startup from Berlin

https://zenmate.com

I was the **Web developer** and marketing engineer at Zenmate. The work was done within the Marketing department of Zenmate. I was working the **CRO** manager, **SEO** manager and Content Marketing manager.

Most of the work was developing landing pages, blogs, creating A/B testings, capturing client data, etc...

- Developing new pages and functionality on the website using **JADE**, **SASS**, **JavaScript** and **jQuery**
- **Marketing**-oriented engineering of the system
- Creating A/B tests using Optimizely and JavaScript
- Working in a medium-sized team (20 people)

Antena 3

A popular radio station

https://antena3.rtp.pt

I was the **Web developer** for this website using **HTMLS/SASS/jQuery** and PHP/WordPress.

Antena 3 is a popular radio station in Portugal, part of the National TV (RTP) group. The website is very dynamic and it includes lots of media features.

- Developed the complete website using WordPress (frontend and backend)
- "Backend" is WordPress core with ACF (advanced custom fields), custom post types and some custom-made plugins.
- Design was from the in-house team
- The website includes a top playlist, an event system, quite a complex back-office for the editorial team to manage it.

Proyecto Hombre

A national non-profit institution in Spain

https://proyectohombre.es

I was the **Web developer** behind this website.

Proyecto Hombre is a non-profit Spanish institution working to recover alcoholics and problematic people.

- Lead developer
- Developed front-end (**Twig**, Sass, **JavaScript**) and backend (WordPress, PHP)
- Developed a **Stripe** donation system
- Developed a **React** location map

Konex

An electrical & control solutions company

https://konex-sa.com/en/

I developed this **mobile app** using **React Native**.

- Developed a **React Native** app for electrical control timing schedule
- Developed the backend using **Directus** and **Node.js**
- The mobile app generates a very high number (hundred of thousands) of database rows

Greenpeace Spain

Greenpeace is a well known ecological association

https://es.greenpeace.org/es/

I worked as **Web developer** and added some functionality to this website. I did not create this website from scratch.

- Developed new functionality on Greenpeace Spain website's
- WordPress, Twig, Timber, JavaScript ES6, SASS
- High load website

Zenlifts

A weightlifting app

https://bitbucket.org/pmqs2/zenlifts/src/master/

I designed and developed this weight-lifting web app as a personal project. It uses React.js and Express.js

The web app was born out of the need for a more precise way to track workouts.

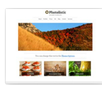
I used ES6 for developing this app. The app uses Material UI React Framework.

RTP

The National TV channel in Portugal

https://www.rtp.pt/

- Developed several websites for RTP
- HTMLS/SASS/PHP/JS
- Implemented Git"



Photolistic

https://bitbucket.org/pmqs2/photolistic/src/master/

An open-source WordPress theme I designed and developed. It's available on the WordPress.org repository and has been downloaded almost 100.000 times.

Widephoto

https://bitbucket.org/pmqs2/widephoto/src

Another theme I designed and developed as a personal project.
